***Universal Industrial Sales, Inc., and Highway Safety Corporation have formed a partnership to manufacture, sell and service Tubular Arch Overhead Sign Structures to all states east of the Mississippi River.***

**Highway Safety Corporation** with manufacturing plants in Glastonbury, Connecticut and Marion, Ohio was established over thirty years ago. Highway Safety Corporation manufactures a variety of highway products including guardrail end treatments, box beam tubular end treatments, bridge railing and pedestrian bridges. Both plants have on-site galvanizing facilities.

Highway Safety Corporation will be Universal Industrial Inc.'s, exclusive distributor for Tubular Arch Overhead Sign Support Structures in all states east of the Mississippi River. Universal will manufacture the structures and Highway Safety will be responsible for sales, customer support and field service. Highway Safety will provide interim storage of the structures in their yard if necessary to support your schedules and will galvanize to supplement Universal's galvanizing operation.

**Universal Industrial Sales, Inc.**, was established in 1978 as a one man operation and has since grown to a 27 acre facility with state of the art metal fabrication equipment, on-site galvanizing, powder coating, sandblasting and painting operation and an in-house machine shop incorporating the latest in CNC equipment.

A new 100,000 square foot fabricating shop was opened in 1997 leaving the original shop open for painting, assembly and roll forming operations. Universal Industrial Sales, Inc., is one of the largest suppliers of overhead sign structures in the country, providing excellent service and quality. The delivery times remain unmatched by anyone in the industry.

# Tubular Arch Overhead Sign Support Structures

Large span signal structure

Double mast sign structures are designed to withstand high winds where large sign panels are required.

Sign structure anchor bolts are shipped pre-assembled in rigid templates for a perfect match to CNC drilled base plates. Anchor bolts are shipped a few weeks before the concrete is delivered, allowing contractors plenty of set up time.

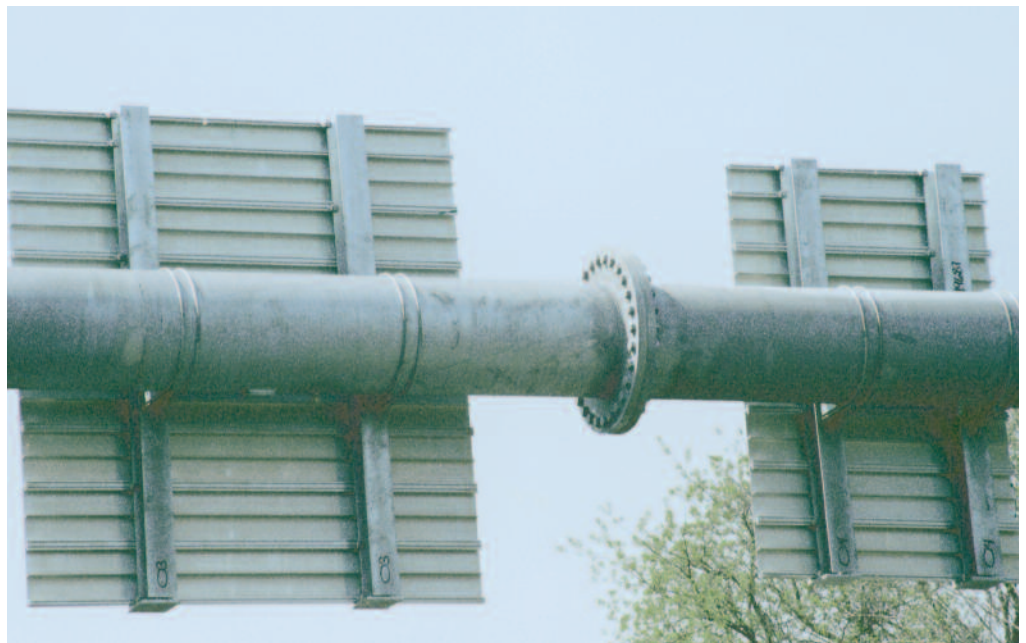

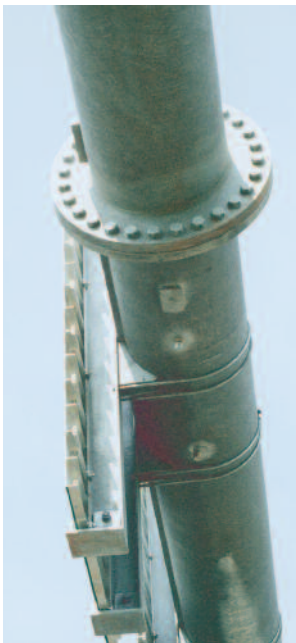

In-house hot dipped galvanizing facilities in Utah, Connecticut and Ohio plants.
